Liferaft Light - RL6 internal with battery - MED/SOLAS

Number: 3.05.0405

SPECIFICATIONS

Made in: United Kingdom

HS Code: 85318070

DESCRIPTION

The RL6 is designed to be a compact, cost effective, reliable internal light for liferafts. It has features to make fixing to the raft easy, and includes a single point of activation for both internal and external lights. Once activated, the internal and external lights are individually controllable.

The RL6 Internal Light features an ultra-flat profile to further aid packing into the Liferaft. The internal light is designed to produce a minimum of 0.5cd in all directions for 12 hours. The battery pack has a maximum shelf life of five years from date of manufacture.
