Guide to Helicopter - Ship Operations

Number: 6.67.0094

SPECIFICATIONS

Made in: United Kingdom

HS Code: 49011000

DESCRIPTION

The growing use of helicopters to serve different types of ships emphasises the need for a close understanding between helicopter pilots and the ship's crew and the importance of standard communications procedures. This guide has been updated to reflect the increasing use of helicopters and the preference of helicopter operators to land on a ship rather than to hover. The current edition is the fourth.
